

DE LA RUE  
CASH SYSTEMS

DeLaRue

# 7500

## Coin Counter/Packager/Verifier

Fast, compact coin processing, suitable for high volume applications

# 7500

## Coin Counter/Packager/Verifier

The De La Rue **7500** is a high speed, compact, single denomination coin counter, packager and verifier.

### Fast, Efficient Throughput

The **7500** increases productivity by accurately counting up to 4,000 dimes per minute. A large capacity tilting inspection pan holding up to 5,000 dimes provides a convenient, efficient method of feeding coins into the hopper.

### Easy to Use

The **7500** will process virtually any coin or token. Coins can be counted by piece or value with the amount shown on an easy-to-read LED 8 digit display.

Programmable bag stops offer the ability to accurately fill bags to any level of coin. With a front off-sort facility, it is not necessary to mount the **7500** on a table corner. The front off-sort is easily accessible to the operator, increasing efficiency.

### Compact

Utilizing minimal counter space, the **7500** fits into any cash room environment. An optional stand with lockable casters enables the **7500** to be transported and used in a wide range of applications.

### Multiple Functionality

With the unique tube mechanism, coins are automatically fed into tubes, allowing a one-handed packaging operation.

With wrap, batch and count models, the **7500** allows flexible coin processing. The ability to attach coin tubes, as well as bags, offers versatility in its application.

De La Rue Cash Systems coin and currency processing products are the direct result of 100 years experience in the design, manufacturing and distribution of world class cash handling solutions. Worldwide service and support is provided through De La Rue Cash Systems' network of branch offices and authorized distributors.
