

THE WORLD LEADER IN CASH RECYCLING TECHNOLOGY WITH OVER 110,000 UNITS INSTALLED, MORE THAN ALL OTHERS COMBINED

To meet the challenges and gain the competitive edge in today's tough business environment successful financial institutions require efficient and proven solutions. That means choosing a business partner that provides the latest technology innovations, industry expertise and award winning customer service.

GLORY's new RBG-300S iCR™ — Intelligent Cash Recycler — by providing increased capacity for large deposits and customer transactions, as well as teller vault buys and sell. Designed for top money centers and financial institutions for courier assisted, non-teller administered, non-traditional open architecture environment with optimum security requirements.

ADVANTAGE GLORY

The Largest Capacity of Recyclable Notes in the Industry

Up to 14,400 note capacity includes approximately 9,900 recyclable notes and a secure 4,500 note collection/overflow collection drawer. Large capacity to meet the high demands of high volume branches and ATM processing.

Treasury Management Recycler

Process, balance and refill ATM cassettes accurately and efficiently. Processing ATM cassettes and vault buys and sells allow better cash management and reduced inventory in teller drawers and branches.

Increased High Speed -- Highest Speed in the Industry

10 notes per second deposit and withdraw means faster processing of ATM cassettes and buys and sells saving both time and money.

Internal Auto Verification

If any cassette is opened, an intelligent internal audit is performed for maximized security.

Auto Load via a Cassette

Security risk is reduced by loading via a cassette.

Enhanced Security

The approved UL-291 safe allows for overnight storage of cash inventory. No need to remove cash to an external vault.

Contemporary Compact Design

Innovative cassette design provides increased capacity and security.
