

Vertera™ 6G

GLORY

INTELLIGENT CASH RECYCLER

The 6th generation Vertera™ 6G Intelligent Cash Recycler is Smaller, Simpler and Smarter alternative for your cash recycling needs.

THE WORLD LEADER IN CASH RECYCLING TECHNOLOGY WITH OVER 110,000 UNITS INSTALLED, MORE THAN ALL OTHERS COMBINED.

Delivering frontline efficiency remains a critical imperative in today's branch environment. Efficient transactions lead to better customer engagements and, ultimately, greater branch profitability. With multi-channel banking, remote and self-directed transactions on the rise, face-to-face customer interactions become more critical than ever before.

Glory's Vertera 6G Intelligent Cash Recycler delivers the needed efficiencies in customer transactions, vault buys/sells, and day-end balancing while also reducing cash exposure in the branch and providing improved security for clients and staff. All this adds-up to more efficient and customer-focused transactions, enabling delivery of an outstanding customer experience.

As branch footprints continue to shrink, recycling technology must be designed to fit more space constrained areas. Additionally, with the move toward

leaner staffing models and the role of the traditional teller expanding to a "universal banker" position, cash recycling must help simplify teller operations.

The Vertera 6G delivers on these requirements. It offers a smaller, simpler, smarter design. With a 30% smaller footprint it has the same capacity as its predecessor. With its large, color touch panel display user operation is both simple and intuitive.

To gain a competitive edge, financial institutions also need technology partners that not only bring innovation to the relationship, but also the expertise to discover your requirements, the experience to design and deploy the right solution, and the commitment to deliver its full value. Using our proven process, Glory has an established record of delivering in all these areas as well as providing outstanding customer service support for the long term.

Vertera™ 6G

Advantage: Glory

Designed for today's branch environment

Compact footprint, but no sacrifice in speed, capacity or performance. Ergonomically designed for both seated and standing applications. Easily fits space-constrained areas.

Ease of Operation

The Vertera 6G is simple for staff to learn initially and operate daily. This supports "universal teller" initiatives. A large, color touch panel LCD provides useful real-time information to your staff as well as useful convenience tools.

Intelligent Cash Recycling

Our SDA II sensor offers advanced banknote authentication, identification and fitness detection capability. Reject rates are low, and our auto-correct feature automatically clears most note jams without operator intervention.

Embedded CashInsight Bridge Technology

With CashInsight Bridge technology built-in to Vertera 6G, your recycler deployment can be remotely monitored and managed to optimize performance. CashInsight Bridge is also the gateway to Glory's Business Intelligence applications such as Workforce Essentials and Cash Essentials. These are our workforce optimization and enterprise cash optimization applications, respectively.

Vertera™ 6G TECHNICAL INFORMATION

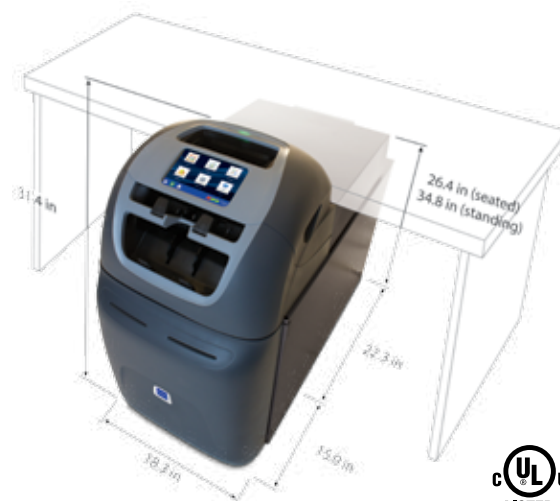

Roll storage system	8 High Capacity RSMs
Capacity	Up to 600 notes per RSM
Touch screen display	7" Color Touch Screen
Note handling	Length: 100-185 mm, Width: 55-90 mm, Thickness: 0.06-0.18 mm Paper, polymer, composite, tactile feature-note capable
Note processing speed	Dispense: 7 notes per second Deposit: 5 notes per second in a single pass
Machine input and output	Input pocket – up to 300 notes per bundle, unlimited bundles Output pocket – up to 100 notes, unlimited bundles Reject pocket – up to 50 notes, unlimited bundles
Interfaces	2 USB device ports or 2 serial connections, 1 USB host port, 1 TCP/IP port
Remote monitoring capability	CashInsight Bridge (standard)
Detection	SDA® II (Secure Document Analysis) Advanced Fitness configurable
Power supply	100-240V AC, 47-63 Hz
Power consumption	1.25 kWh typical average daily power consumption (based on 3000 note movements per day)

Dimensions and Weight	Model	Dimensions (L x W x H)	Height under desk	Weight
	Seated	37.3 x 18.3 x 26.4 in 948 x 465 x 670 mm	26.4 in 670 mm	697.4 lbs 317 kg
Standing	37.3 x 18.3 x 39.8 in 948 x 465 x 884 mm	34.8 in 884 mm	798.6 lbs 363 kg	

Options	<ul style="list-style-type: none"> InstaChange coin dispensers (single or dual) Uninterruptible power supply Connectivity to all open network architectures Sitting or standing height configurations CashInsight Bridge remote monitoring and device management Secure Transfer Concept (STC)
